Annual Training Requirement

By: DSS

As you all know by now, DSS requires that all clearance holders take annual training. The training requirement consists of two parts: One is Counterintelligence Awareness and Security Brief and the second is the Insider Threat Awareness Brief.

Please click (or copy and paste) the links below to initiate the two training modules. Upon completion (NLT 30 SEP 2017), please print out both certificates and email to me at holly.higgins@wbsi.com

DSS In Transition

By: DSS.mil

The world is rapidly changing and DSS is changing too. Where the agency once concentrated on schedule-driven National Industry Security Program Operating Manual (NISPOM) compliance, DSS is now moving to an intelligence-led, asset focused, and threat-driven approach to industrial security oversight.

The need for change is clear. The United States is now facing the most significant foreign intelligence threat it has ever encountered. Adversaries are successfully attacking cleared industry at an unprecedented rate. They are using multiple avenues of attack, varying their methods, and adjusting their priorities based on the targeted information they need. As a result, they are upgrading their military capabilities and competing against our economy using the very same information they stole from cleared industry.

DSS has recognized this fact and is now moving forward in partnership with industry to design, develop, and pilot a multidimensional approach to industrial security oversight. Our goal is to help cleared industry ensure that contracted capabilities, technologies, and services are delivered uncompromised. To learn more about this new approach, please review the DSS in Transition Information Sheet:
